

# High School Apprenticeship Program (HSAP)

The High School Apprenticeship Program (HSAP) provides high school students with an authentic science and engineering research experience alongside university researchers sponsored by the Army Research Office. Through these commuter programs students will develop skills in Army critical science and engineering research areas in a university lab setting to prepare them for the next steps of their educational and professional career. A primary objective of the HSAP program is to provide a mechanism to expose new students to research opportunities in the sponsored laboratory.

**Topic:**  
**Engineering**

**APPLICATION DEADLINE: MARCH 15, 2021**

**PRICE RANGE: PAID!**
