

PATH-UPS Young Scholars

Precise Advanced Technologies and Health Systems for Underserved Populations (PATHS-UP) Young Scholars is a National Science Foundation funded three-week summer internship for 10th and 11th grade students who are age 16 or older. The aim of this program is to help four students gain experience in engineering research, scientific writing and communication, build a network of peers, and learn about various college pathways. The internship will focus on Machine Learning and Artificial Intelligence. Students will gain experience in engineering research, scientific writing and communication; building a network or peers; and learning about various college pathways
